

Instructions

1. Deadline for task2 is october 11, 11:59 pm 2021
2. Complete the resource list before working on the tasks
3. Make sure you try to understand the algorithm. A complete mathematical understanding is not necessary; an intuition will do.
4. Hyperparameters are the most important part of any ML algorithm. Playing with them will make your model better. Hence it is important to know what most of the popular hyperparameters are and what they affect in the algorithm. (google hyperparameters in ML if you are confused about what they are)
5. Lastly, ask all doubts in the learning period groups; no doubts on pc will be entertained from now on. Y'all can help each other too! Answer doubts and participate in discussion!
